Personal Statement

I am a computer science graduate London. I love programming and have done many extra-curricular activities which include participating in Hackathons, actively attending tech society seminars and joining the robotics team.

For more please refer to: <http://stef-c.com>.

Experience

2019, Final year thesis on machine learning/AI

2018, Summer Analyst at Goldman Sachs, London, England

Worked on internal software used by bankers and assistants which list clients.

Worked on an internal chrome plug-in which makes it easier for bankers to reach out to clients.

Worked on internal software which formats case study templates into pure HTML to be sent out by email to the firm. Added additional templates for different regions.

Skills: Java • HTML • CSS • AngularJS • React • SVN • Experience with unit testing (Mockito and Karma)

2017, Summer intern at Ticket Tailor, London, England

Designed responsive landing page for Ticket Tailor's Shopify App.

Used Gettext to wrap WordPress code so that it could be translated easily.

Researched market competitors and compiled data into spreadsheets.

Skills: Communication • HTML • CSS • Javascript • Experience with market research • Experience with Wordpress

2015, Summer intern at Reallusion, Taipei, Taiwan

Designing and editing promotional videos and testing out software.

Hobbies & Interests
